

BIO SILVER™

DISINFECTANT, FUNGICIDE & VIRUCIDE

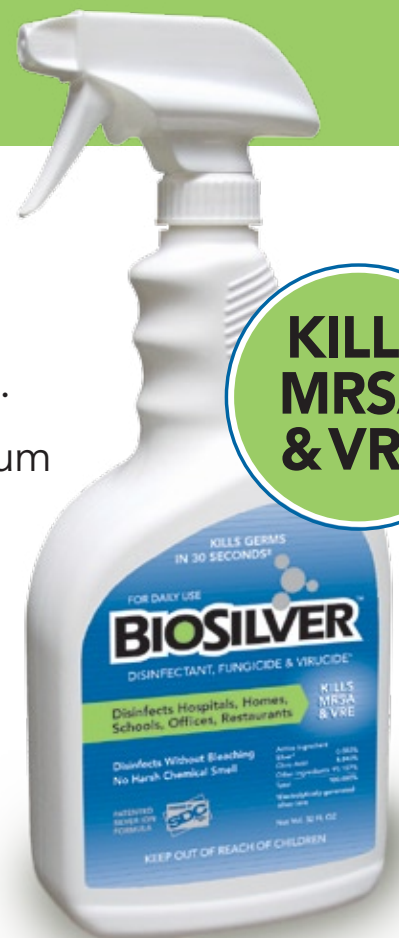

CONTACT SURFACES IN THIS FACILITY DISINFECTED WITH **BioSilver™**

This facility is aware of your concerns and is committed to effective disinfection. They have chosen to use breakthrough **BioSilver** in their building and equipment maintenance program.

BioSilver is a new, highly effective broad spectrum disinfectant which when used as directed completely eliminates bacteria, virus, and fungus on environmental hard surfaces.

Unlike traditional disinfectants, **BioSilver** is colorless, odorless and does not require Warning or Caution language on its label.

BioSilver deodorizes and provides a unique **24 hour residual protection** against common bacteria on surfaces properly treated.
